[American Record Guide](#) (Kilpatrick - 01.09.2008)

This program opens and closes with big organ works arranged for brass quintet and organ. It is the kind of recording where the organist shows he can overwhelm any competition, and where the brasses play as loudly as they can in an effort to be heard at all.

The middle of the program – three pieces by Vierne, an Offertory by Lefebure-Wely, and three more pieces by Vierne – is for brass alone. The International Brass Quintet, composed of players from various European countries, does well with them.

For the aficionado, complete specifications for the Seifert organ of the cavernous Papal Basilica of Our Lady at Kevelaer, Germany are included.
